

SOYBEANS

AQUA-YIELD®

Adding our nanoliquid® products into your current fertility and crop protection program is easy; our solutions enhance the efficiency of your crop inputs without disrupting your current approach. Our general application rate is 4 oz/ac.

◆ NANOLIQUID® SOLUTIONS

IMPROVE PESTICIDE PERFORMANCE

Nanoliquid® products are a new category of adjuvant that increases performance of systemic and translaminar pesticides.

INCREASE YIELD AND QUALITY

Nanoliquid® products promote increased yield and quality by driving nutrients into roots and leaves through a unique delivery method.

PROMOTE STRESS TOLERANCE

Aqua-Yield® offers products to keep crops healthy during drought and high pest pressure, providing insurance for your crop.

NEW: COATING TECHNOLOGY

Ask your Aqua-Yield® sales representative about NanoCote™ granular fertilizer coating technology or visit www.nanocote.com.

SOYBEAN PRODUCTS

NanoPro®

NanoPro® carrier adjuvant increases uptake of herbicides, insecticides, fungicides, and PGR products using a unique mode of action.

NanoN+®

NanoN+® carrier adjuvant increases uptake of liquid nutrient blends using a unique mode of action, decreasing waste and improving yield.

NanoK® 0-0-21

NanoK® is a carrier adjuvant plus potassium acetate designed to drive crop inputs while delivering potassium at critical crop stages.

NanoFe™ 4Fe EDTA

NanoFe™ is a carrier adjuvant that also delivers a boost of EDTA chelated iron, supporting respiration, photosynthesis, and chlorophyll formation.

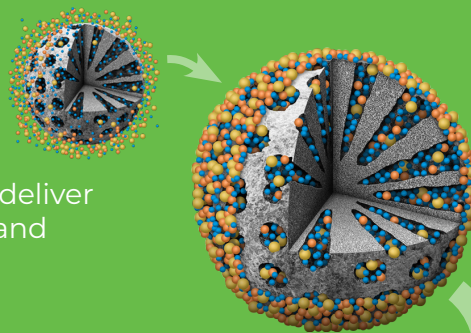

◆ HOW IT WORKS

1) MIX

2) LOAD

Nanoparticles load and deliver thousands of nutrients and molecules at once.

3) DELIVER

Deliver up to 25% more with Aqua-Yield nanoliquid® products.

◆ WHAT TO EXPECT

Nanoliquid® products are a proven tool to help farmers better manage their planting programs.

Soybean growers can expect a starting **3:1 ROI** using NanoPro and other nanoliquid products with foliar pesticide applications.

- Better rooting
- Higher pod counts
- Lower pest pressure
- Better stress tolerance

Apply at **planting** and at **R1-R3** for optimal result.

"We also use it [NanoPro] with our insecticide and fungicide. We liked it so much that we decided to not do any trials without the product. For the 2023 growing season we are really looking forward to what nano has to offer through Aqua-Yield."
