

CORN

AQUA-YIELD®

Adding our nanoliquid® products into your current fertility and crop protection program is easy; our solutions enhance the efficiency of your crop inputs without disrupting your current approach. Our general application rate is 4 oz/ac.

◆ NANOLIQUID® SOLUTIONS

IMPROVE PESTICIDE PERFORMANCE

Nanoliquid® products are a new category of adjuvant that increases performance of systemic and translaminar pesticides.

INCREASE YIELD AND QUALITY

Nanoliquid® products promote increased yield and quality by driving nutrients into roots and leaves through a unique delivery method.

PROMOTE STRESS TOLERANCE

Aqua-Yield® offers products to keep crops healthy during drought and high pest pressure, providing insurance for your crop.

NEW: COATING TECHNOLOGY

Ask your Aqua-Yield® sales representative about NanoCote™ granular fertilizer coating technology or visit www.nanocote.com.

CORN PRODUCTS

NanoPro®

NanoPro® carrier adjuvant increases uptake of herbicides, insecticides, fungicides, and PGR products using a unique mode of action.

NanoN+®

NanoN+® carrier adjuvant increases uptake of liquid nutrient blends using a unique mode of action, decreasing waste and improving yield.

NanoK® 0-0-21

NanoK® is a carrier adjuvant plus potassium acetate designed to drive crop inputs while delivering potassium at critical crop stages.

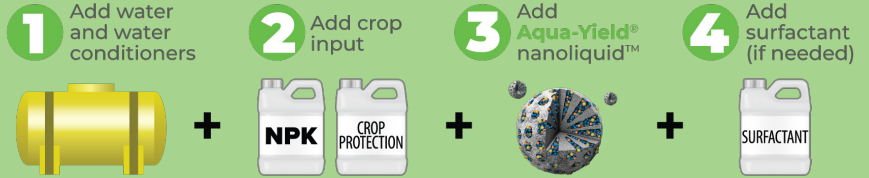

NanoCS™ 1-2-1-3Zn

NanoCS™ is a carrier adjuvant plus proprietary crop starter blend designed to drive crop inputs while increasing yield and stress tolerance.

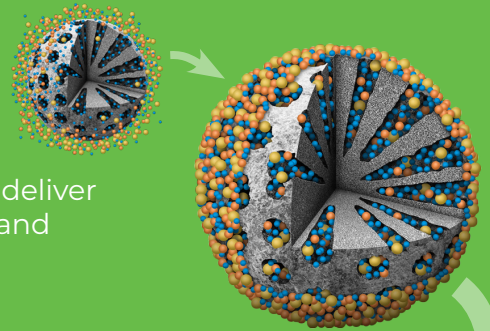

◆ HOW IT WORKS

1) MIX

2) LOAD

Nanoparticles load and deliver thousands of nutrients and molecules at once.

3) DELIVER

Deliver up to 25% more with Aqua-Yield nanoliquid® products.

◆ WHAT TO EXPECT

Nanoliquid® products are a proven tool to help farmers better manage their planting programs.

Corn growers can expect a starting **3:1 ROI** using NanoCS in-furrow and other nanoliquid products with foliar pesticide applications.

- Average 4 bu/ac increase
- Higher stand counts
- Lower pest pressure
- Increased UAN uptake
- Better stress tolerance

Apply at **planting** and at **R1-R3** for optimal result.

"NanoPro® is one of my favorite products that we promote. It has a low-rate application, doesn't cost a grower much to use it, and makes everything in the spray tank, more efficient. We talk a lot about efficiency, and nothing is more efficient than NanoPro®. It is something every grower should try."

Sonny Malone, Sugar Creek Ag
