

# DRY EDIBLE BEANS

AQUA-YIELD®

Adding our nanoliquid® products into your current fertility and crop protection program is easy; our solutions enhance the efficiency of your crop inputs without disrupting your current approach. Our general application rate is 4 oz/ac.

## ◆ NANOLIQUID® SOLUTIONS

### IMPROVE PESTICIDE PERFORMANCE

Nanoliquid® products are a new category of adjuvant that increases performance of systemic and translaminar pesticides.

### INCREASE YIELD AND QUALITY

Nanoliquid® products promote increased yield and quality by driving nutrients into roots and leaves through a unique delivery method.

### PROMOTE STRESS TOLERANCE

Aqua-Yield® offers products to keep crops healthy during drought and high pest pressure, providing insurance for your crop.

### NEW: COATING TECHNOLOGY

Ask your Aqua-Yield® sales representative about NanoCote™ granular fertilizer coating technology or visit [www.nanocote.com](http://www.nanocote.com).

## PRODUCTS

### NanoPro®

NanoPro® carrier adjuvant increases uptake of herbicides, insecticides, fungicides, and PGR products using a unique mode of action.

### NanoN+®

NanoN+® carrier adjuvant increases uptake of liquid nutrient blends using a unique mode of action, decreasing waste and improving yield.

### NanoK® 0-0-21

NanoK® is a carrier adjuvant plus potassium acetate. NanoK® can help the crop meet peak demand to improve plant health, enhancing pod set and fill.

### NanoFe™ 4Fe EDTA

NanoFe™ is a carrier adjuvant plus a boost of EDTA chelated iron designed to help improve plant health and avoid iron chlorosis.

## ◆ HOW IT WORKS

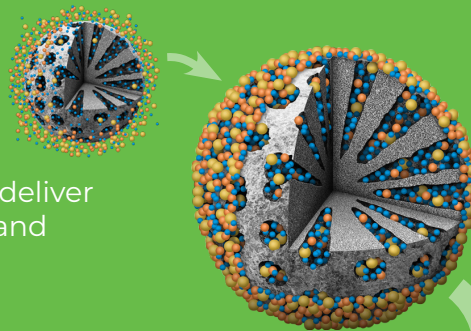

### 1) MIX

### 2) LOAD

Nanoparticles load and deliver thousands of nutrients and molecules at once.

### 3) DELIVER

Deliver up to 25% more with Aqua-Yield nanoliquid® products.

## ◆ WHAT TO EXPECT

Nanoliquid® products are a proven tool to help farmers better manage their planting programs.

Edible bean growers see the highest return on investment when adding nanoliquid products with fertilizer applications of UAN, and with foliar potassium and iron applications. Foliar nutrient products combined with pesticide applications enhance both fertility and active ingredient uptake.

- Better UAN efficiency
- Decreased pest pressure
- Increased crop vigor

Ask your Aqua-Yield sales representative for region-specific application information.
